KEY PROJECTS

Finprov
Comprehensive, accessible, and high-quality accounting education through a teaching app.

The app is designed to cater to students, professionals, and anyone interested in learning accounting by offering structured courses, study materials and video classes.

Prism (Panasonic)
Prism is an advanced warehouse management app developed for Panasonic to enhance the efficiency and accuracy of warehouse operations. The app integrates various modules such as binning, packing, picking, sorting, and more to streamline and optimize the management of inventory and warehouse processes.

Edumartial
Management of a sports school by providing a comprehensive app that caters to the needs of schools, coaches, and students. App offers specialized logins for each user type and tracks the activities and sports performance of students, aiming to enhance the overall efficiency and effectiveness of sports education.
